

Acknowledgements

First of all, we would like to thank GOD for his mercy and will for us to finish this project. We would then like to thank Prof. David Vernon for his helpful project tips, his wisdom and his extreme patience with us, without that, our project may have been crushed (we will always remember your help through our lifetime). Also, our thanks go to Dr.Hassan Barada for his excellent project seminars, which guided us through the project steps. Another helpful and great lecture was Dr.Rachid Benlamri, which, without his lectures, we would not have known how to handle our project in a good way.

We would also like to thank our dear friends who were with us the whole time of the project, especially Ahmed Sultan, Mohammed Al Shamsi and Khalid Belhoul. You really made our project a fun thing to do.

Finally, we would like to thank our families for their kindness and great help for us through our stressful studying years.

Thank you all for making Simutraffic a great programming project.
